Experience

Chief Technology Officer, Donadora — 2017 - Present
Mexico City, Mexico

- Organized the Tech department to better manage the workload, increasing accountability and reducing delivery time on bug resolution and new features, as well as introducing better feature design and deployment practices.
- Extracted the core business layer to a Rails 5 API application to allow white-labeling and the internalization of Donadora.
- Designed and built a responsive Rails 5 application to consume our internal API and manage all Mexico specific aspects of the operation.

Senior Developer, GuideOn — 2014 - 2017

Oakland, California (Remote).

- Developed a user-programable Optical Character Recognition model to target specific fields on different paper forms.
- Integrated APIs with the application including mailing, geolocation and metric tracking.
- Created custom ActiveAdmin views to facilitate managing the relationships between database objects.

Business Process Analyst, AGEMAR — 2013 - 2014

Caracas, Venezuela

- Designed business process focused features for the 'Agentia' project.
- Designed, updated and documented business processes and KPI's for the "Agentia" project.
- Improved for business processes and system functionality focusing on simplicity, effectiveness and efficiency.

Business Process Architect, Zurich Financial Services — 2011 - 2013

Caracas, Venezuela

- Designed and documented business processes and KPIs.
- Performed Business Impact Analysis on system/process changes.
- Classified and prioritized issues, designed workarounds and requirement elicitation documents and test scenarios.
